

CADS Enhancement Centre

The CADS Enhancement Centre was formed to cater to the special educational needs of children with Learning Disabilities (LD).

They are children with single or multi neurological conditions, unable to learn the usual way like the rest of their normal peers in mainstream school.

Learning Disability is a tragic condition. Briefly, these children struggle to receive, retain and communicate information, learning today and forgetting it tomorrow. They find it awfully difficult to concentrate and reading is such a laborious effort. These setbacks are beyond their control. Often they have been labelled as stupid, dumb, lazy or retarded when in actual fact, these conditions usually hide a bright child whose intellect is waiting to be released given the right kind of alternate academic environment and therapeutic interventions.

The foundation upon which the CADS Enhancement Centre was developed is the belief that early intervention for children who are neurologically and developmentally disabled can enable them to achieve their full potential and enable them to attain a level of independence that will allow them to contribute appropriately to the society.

The program at CADS Enhancement Centre is open to LD Children of all faiths and religions, across all economic strata of family backgrounds.

We have made great strides since our inception despite the financial burden. Each year we constantly strive to seek grants and raise donations to fill the CADS Centre Fund to assure the solvency and longevity of the CADS Enhancement Centre.

President's Message

On behalf of the Management Committee of CADS Centre, I am honored to welcome all of you to this special charity event.

The **“Children for Children”** Charity Concert would not have been possible without the devotion and considerable organizational skills of Sam & Co, the generous support of sponsors, donors and most of all the selfless dedication and unbridled enthusiasm of the children performing in this concert.

CADS is the acronym for *“Cerebral Palsy, ADHD, Down Syndrome, Dyslexia and Slow Learners”*. These learning disabled children work doubly harder than their normal peers. They persevere and are determined towards achieving baby steps of cognitive skills. Just because they cannot cope with mainstream education does not mean they have to suffer needlessly throughout their schooling years. Given the proper interventions and alternative education system, they have proven their critics wrong.

It is in the light of nurturing and maximizing the potentials of those special needs children that the CADS Centre endeavors and the CADS children quality of life can dramatically improve.

Enjoy your afternoon and thank you.
